Done list of last sprint
- Expanded Database UI to accept more input parameters
  - [Finished by Jacob]
- Updated all analytics to be updated/changed by any accident insertion/update/deletion
  - [Finished by Luke]
- Changed the Top 10 Most and Least Accidents analytics so that their information is determined when an accident is inserted/updated/deleted in the Database page. Before this, these analytics determined their information every time the Analysis page was opened.
  - [Finished by Luke]
